Headteacher Message

This week, we were honoured to receive a visit from the national behaviour hub, which provided valuable insights and feedback on our ongoing efforts to maintain a positive and conducive learning environment. This visit, affirmed our current practices and supported us with ideas for the future.

For our youngest pupils, we have been busy conducting nursery and reception transition events. These carefully planned sessions are designed to ensure a smooth and comfortable transition for our new pupils, helping them familiarise themselves with their new environment and fostering a sense of belonging from the very start.

I am thrilled to announce the completion of our new daily mile markings on the playground. This addition will further encourage regular physical activity among our pupils, contributing to their overall health and well-being. We believe that a healthy body supports a healthy mind, and these markings will serve as a constant reminder and motivation for our daily exercise routines.

It gives me great pleasure to extend a huge congratulations to Mr. Austin for his outstanding achievement in securing £10,000 for the development of our internal learning area. This significant funding will allow us to enhance our learning spaces, creating more engaging and effective environments for our students to thrive in their educational journey.

On a practical note, I must draw your attention to the weather warning issued for next week. With temperatures expected to rise, it is crucial that we take necessary precautions. I kindly request all parents ensure their children come to school prepared with sun cream, sun hats, and plenty of water. Your co-operation in this matter is essential to ensure the comfort and safety of all our pupils during this warm spell.

Thank you for your continued support and engagement with Park View Academy. Your involvement plays a crucial role in the success of our school community.

SAFEGUARD FROM THE SUN

You're exposed to
UV RADIATION
even on
CLOUDY DAYS

Stay in the
SHADE
whenever
you can

WEAR

Sunglasses

Protective
clothing

Hat

SPF 30+
sunscreen

UV exposure is highest between

10AM 
AND **4PM** 

STAY HYDRATED,
TAKE BREAKS
and REST IN
THE SHADE
to prevent heat
stress and stroke

MANY MEDICATIONS INCREASE SENSITIVITY TO SUNLIGHT AND THE RISK OF SUNBURN

These include thiazides, diuretics, tetracycline, doxycycline, sulfa antibiotics and nonsteroidal anti-inflammatory drugs, such as ibuprofen

UV radiation reflects off **WATER, CONCRETE, SAND, SNOW** and **LIGHT-COLORED SURFACES** and can harm your eyes and skin

Parent SEND Information Session

Sensory Processing

Does your child: have either a low or very high pain threshold, appears clumsy, enjoys rocking and swaying, runs off without regard for safety, has no regard for personal space, covers their eyes or ears frequently, is picky with food preferences and textures, has difficulty controlling their emotions or focusing their attention, has challenging behaviour?

Come and meet other parents and learn about sensory processing from an expert (Sam Fair from SHINE Therapies). Discover more about how the sensory environment can affect your child's functioning in the world.

Pick up some strategies and skills to better understand and support children who may either seek or avoid certain sensory experiences.
